

# HP ENGAGE ONE GENESIS STAND

ENHANCING CUSTOMER EXPERIENCE AND  
INCREASING HP ENGAGE ONE VERSATILITY

The HP Engage One is an integrated processor unit & 14" touchscreen ideal for use in retail & hospitality.

ENS have developed the Genesis range of stands to increase ergonomics with screen tilt and rotation with various mounting options.

The Genesis stands are designed to allow the Engage One to be installed where counterspace is limited and where additional devices can be managed within the Genesis stand's small footprint.

- ✓ 180° tilt and 300° rotation for optimum screen angle
- ✓ Cable management for the HP Engage One for easy maintenance and quick installation
- ✓ Attaches to the HP USB Hub. This allows the Hub and screen to become an expanded "all in one" desktop solution, ideal where there is little space for an underdesk hub
- ✓ Can be fitted with an extra monitor to create a back-to-back configuration. The extra screen can be used for marketing, branding and other information for the customer
- ✓ Comes with a variety of mounting options for extra flexibility, including payment terminal integration
- ✓ Colour options to match retailers' branding and store environment
