

FLEXIPOLE CONNECT WITH UV-CLEAN

EASILY UPGRADE YOUR EXISTING SPACEPOLE* FOR A SAFE, SECURE & FLEXIBLE POS SOLUTION WITH NEXT-GEN SURFACE DISINFECTION

FlexiPole™ Connect from ENS allows your SpacePole* to be easily and cost effectively upgraded to include our UV-Clean solution for a safe and secure Point of Sale.

The Connect is designed to securely mount all major payment devices, with the flexibility to swap out and upgrade devices with minimal disruption and expense.

Upgrading to FlexiPole™ Connect enables the addition of UV-C disinfection at the Point of Interaction. This game-changing technology fits to all FlexiPole stands and allows for safe and effective disinfection of high touch areas such as the payment terminal keypads

With liquid disinfectants causing damage to payment devices and overlays nullifying PCI compliance, UV-C is the gold standard for disinfection.

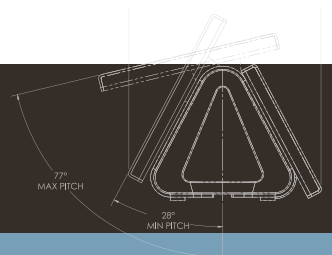

* Upgrades SpacePole Duratilt stands

- ✓ Protects & disinfects your investment for a secure and safe Point-of-Sale
- ✓ Easy installation and upgrade
- ✓ UV-Clean adds 24/7 automatic disinfection, removing the human element from your cleaning routine
- ✓ UV-Clean kills viruses, including Coronavirus and harmful bacteria, including *E. coli*, without damaging your device
- ✓ Improves safety and efficiency at the Point-of-Sale
- ✓ Quick Release, Locking or Tethered options
- ✓ Helps you to comply with accessibility/disability regulations and PCI DSS/P2PE security requirements

WORKS WITH ALL MAJOR PAYMENT DEVICES

ENS. Better by Design.
