

# FLEXIPOLE TAB

## FLEXIBLE TABLET MOUNTING SOLUTIONS FROM ENS

This simple solution to tablet mounting from ENS gives users flexibility to mount any tablet type – iOS, Android or Windows, on a counter top or wall mount. Decide at the point of installation whether your tablet needs to be in portrait or landscape and simply fit the universal backplate to the tablet using our high bond adhesive pad. This can be used either directly on the tablet or attached to a tablet case.

Once the universal backplate is attached, the tablet can click into place on any of our FlexiPole stands allowing full access to the tablet features. Stand options include countertop, compact countertop and wall mount. Each of these can be quick release allowing users to go mobile easily. Alternatively, the stands can lock the tablet in place for a more secure solution.

Once mounted, the tilt and swivel features of the FlexiPole stands\* allow the tablet to be easily adjusted to face the customer or the associate.

- ✓ Any tablet type/size
- ✓ Mount in portrait or landscape
- ✓ Quick release or locking
- ✓ Counter or wall mounted
- ✓ Optional weighed base as an alternative to fixing to the counter
- ✓ Automated UV-C disinfection can be added to all configurations

In the current climate, tablets can be a great tool to reduce face to face interaction, but these high-touch surfaces can also play host to high counts of potentially harmful micro-organisms. ENS have developed a market leading, automated disinfecting solution using UV-C light. UV-Clean can be added to your tablet stand solution to ensure the surface is free from bacteria and viruses such as Coronavirus.

The flexibility of this solution depends on the way the stand is installed and used. Countertop stands can be mounted to the counter with either a high bond adhesive pad (included) or with screws. If the stand needs to be moved around, ENS offer a weighted base so that the stand is stable but can also be moved to different locations
