

SAFE TO PAY HANDLE AND WALL MOUNT

ENHANCING SAFETY & SECURITY
AT THE POINT OF SALE

The Safe To Pay Handle by ENS securely mounts a wide range of payment devices to provide enhanced safety and security at the point of sale.

The handle helps maintain a safe distance between the associate and the cardholder while improving PIN entry security and contactless payment experience. It is ideal for use in a variety of applications such as drive-thru, pay at table, manned kiosks and more.

The ENS Safe To Pay handle is made from the most durable, yet light-weight components. Terminal/PINPad cables are safely routed within the handle, protecting them against twisting/breakage and protecting the payment device against theft and damage.

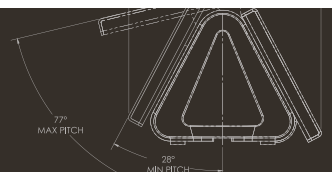

Further secure the terminal/PIN Pad against theft or substitution (PCI-DSS) when used with a tether.

- ✓ Enables distancing at the point of sale
- ✓ Compatible with most payment devices
- ✓ Protects payment device against theft and damage
- ✓ Durable yet light weight for ease of use
- ✓ Wall Mount can be installed inside as well as outside, facilitating no-touch contactless payments
- ✓ Tether option for extra security
- ✓ Advanced cable management, including cable clamps, for strain relief

WORKS WITH ALL MAJOR PAYMENT DEVICES

ENHANCING SAFETY & SECURITY AT THE POINT OF SALE

Ease of use at the point of sale is of the utmost importance in quick service locations such as drive-thru. Terminals mounted on the Safe to Pay handle can either be presented to the cardholder in their car or could also be mounted outside on the optional wall mount during trading hours. Neither the associate or the cardholder would have to touch the device for a contactless transaction to take place.

The wall mount can also be installed inside, giving the terminal a safe place to be stored when not in use. A robust channel within the wall mount acts as a tether anchor point, should the business wish to tether the device to a fixed spot.

The Safe to Pay Handle by ENS is currently being used across the globe by many of the world's leading quick service restaurants to improve customer experience, increase efficiency at the point of sale and strengthen safety measures for customers and staff.

TECH SPEC
