

LEADING THE CHANGE TO A SAFE WORKING, SHOPPING & EATING EXPERIENCE

LOCH LEVEN'S LARDER DEPLOYS ENS UV-CLEAN TO ENHANCE COVID SECURE EXPERIENCE

Loch Leven's Larder is an award-winning, 120 seater restaurant, deli and retail business with idyllic views over the loch and surrounding hills. Adapting the business to be Covid safe for customers & staff was the management priority of summer 2020. Social distancing was encouraged with clear signage and customer flow directions, tables in the restaurant were reduced and screens were installed at the point of purchase for customers.

To ensure all technology was free of bacteria and viruses ENS Group UV Clean solutions were installed in the premises. On the touchscreens in the retail food hall, textile shop, and café the uv24 monitor mounts were installed. This ensures that the touchscreens are cleaned automatically after every transaction by staff members, particularly useful as staff were reporting the screen not responding well to gloved hands or hands still slightly wet with hand sanitiser.

The UV-PT solution for payment terminals is installed to ensure the payment terminal is cleaned automatically after use by every customer.

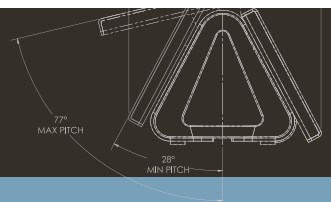

The UV Clean standalone solution ensures that all mobile devices including tablets and mobiles are cleaned after use by staff .

Installation of the UV Clean solutions has ensured virus and bacteria free technology after every use, enabled staff to concentrate on customer service instead of cleaning technology surfaces and eliminated the risk of damage to technology of manual cleaning by disinfection liquids.

UV Clean technology has enabled Loch Leven's Larder to be able to inform customers and staff that use of the instore technology is safe.

ENS. Better by Design.
