

LEADING THE CHANGE TO A SAFER GP CLINIC EXPERIENCE

MILLHILL GP SURGERY INSTALLS ENS UV-CLEAN TO ENHANCE COVID-SECURE EXPERIENCE

Pandemic or no pandemic, it is crucial that healthcare providers take effective steps to ensure the utmost levels of sanitation and hygiene in their premises.

Millhill GP Surgery in Dunfermline, Scotland are one such provider taking vital steps to ensure patient and staff safety. The surgery operates a touch-screen patient check-in system so as to streamline the check-in process and decrease the amount of face-to-face interaction between patients and staff. ENS' UV-24 cleaning solution was installed on the practice's patient check-in screen with the primary goal of preventing the spread of bacteria and viruses and thereby reducing the risk of infection for all using the device.

Installed at Millhill, the UV-24 is an attractive and effective solution for a range of touch-screen devices. With motion sensing for the safe, automated deployment of a non-visible UV-C light, the solution inactivates 99.9% of bacteria, viruses and mould at the cellular level. As such, it is an ideal solution for battling not only Covid-19, but also more common ailments such as the flu, norovirus and the common cold.

By reducing the need for face-to-face contact with administrative staff, ENS' UV-24 solution has helped to protect both patients and staff at Millhill GP Surgery. According to Millhill's Practice Manager, Susane Hogarth, "patients are happy to use the automated check-in system when advised that it is clean and protected by ENS' UV cleaner". Likewise, when speaking of the solution's benefits, Susane also highlighted the time it has saved staff in terms of cleaning the check-in screen repeatedly throughout the day, despite the pandemic having reduced footfall to the practice. In turn, the use of UV-24 also helps to avoid costly damage which can often be incurred via the manual cleaning of technological devices with traditional disinfecting liquids.

KEY BENEFITS

- ✓ Automated disinfecting cycle
- ✓ Motion activated for safe deployment of UV-C light
- ✓ Independent low energy LED task light
- ✓ 100% recyclable UV stable ABS plastic
- ✓ USB power cable & power adapter included
- ✓ One-year warranty
- ✓ Extended service options available
