

UV-Clean Monitor Mount (UV24-MM+)

Safely Disinfect High Touch Devices

UV-C light is used to eradicate harmful bacteria, including antibiotic resistant viruses (including Coronaviruses SARS and MERS), Staphylococcus aureus (MRSA) and Enterococcus (VRE), as well as E. coli, difficile, Proteus spp., Klebsiella spp and Listeria spp. UV-C light is being used globally to fight the COVID-19 strain. Our automated chemical-free disinfecting technology is your proven ally against the spread of infectious microorganisms.

The UV24-MM+ by ENS is a flexible solution designed to protect your customers and employees using touchscreens or other high touch surfaces. 24/7 automated disinfecting cycles of low doses of UV-C light are harmful to pathogens, but designed to be safe for human interaction.
